

On the Water semantic field in Sumerian

Rencontre Assyriologique Internationale - The 62-nd RAI Meeting - University of Pennsylvania, USA

ANASTAS SHUKE Timma, ALBANIA anastasahuke@gmail.com

A betract Thewater is

water is them of important element in our lives. It is part

The states is the occut importante leavest incomitives. It is pasts of our food, our body, it is needed and it is present almost exceptible in our life and activity. As transpool anderson to its chemical formation high. Seems to be the A-handy confidence to its chemical formation high. Seems to be the A-handy confidence in the congenitation and the time atoms of hydrogen respectively.

The sign for state A, since the photographic origins, is said to represent Tailing states. This formed of the celescripts, the said and asset and ones, which this increpe sents acknot off-alling states, the rain. The compact of rain is not re-primary than that of water because the concerning of rain is not re-primary than that of water because the concerning the analysis of the properties of rain in a source primary from its many the strate of space and time, than the vaster of spaces; between the concerning the said of the continued of the feature of the said of SiT as the offers signs, thus keeping the vertical direction of rain.

By analyzing filterally the expressions The water is if it, water is existence? If we could get the possible quatton A = cates, A-1 is. This choose is the country of the control has the said, which is the country and the said of the control of the said of the category and the country of the said of the category and the category and the country of the said of the category and the category and the country of the said of the category and the category and

is examence, "exceeding or the personnel of the construction and any of the construction of the constructi boil, etc. They will be discussed in this work, by their graphic etymology (g e) thompictographic period to OS and later.

A related language must explain the signal-pic tion and must of its values, and be compared as per ormatic range. Sometic constitions one on to be a verb in and uniquities, trying to graphically assume the meaning of a sign, the first intent would be to find a Superior verb being presentantly or then developed in Albarian. A vertice depicted by the object, "many that verbs." The developed words are compared and found through et smokept at division of applications discompanies considering the Tox operators," namers to implify a polyphonest divising

Albanian is present in any of the following examples

It is one of the illements. The earliest plategraphs seem to represent "floreing-rooter," then by Chingot to also "full ingresses," the minus the pure atterm of water. We might express the idea some through the tot run by the equation [A] = [a ruin]. This might be the resonant by the A sign is not abused for \$7 as the other signs, than keeping the vertical direction of rain. The graphic representation of rain with disable/makiple writes lateries, and of equity or a pala with a single stable, has been consumely used at all times, they are "testinate" signs from suche quaternaid e econies, the statement system on, while the Leadquet of Asign as presents graphically there in.

The original value A = a_0 , so it may have the values a or use found in the lexical late of libra (Fit yes 2000–201), then there $a = a = a_1$ of which ware "Alb Also, sing, a_0 = a_0 in "Alb

Conclusions

- Sumerian language seems to have continuity in the graphically romed meanings of pictographic and later coneitorms igns.
- 2- Graphic stymology is a productive may to precisely state the values/meanings of signs, so the spoken language behind.
- 3- The "Water Semantic Field" in Sumerian may have an in-depth correspondence and mutual explanation with Albanian.
- 4- Having a thorough relationship with Sumerian, Albanian language mayoffer its concrete contribution to the studyof the languageand culture of Klengir 'Good Land.'
